Model aco-8 and aco-8 asphalt version are the automated Cleveland Open Cup flash point tester from Tanaka. Based on 45 years experience of manufacturing the automated flash point testers, innovative 8<sup>th</sup> generation series has been released. The theme of 8<sup>th</sup> generation is “Ergonomic, Versatile and Premium”.

- ERGONOMIC COLOR-COORDINATED DISPLAY FOR HIGH VISIBILITY FOR EVERYBODY (UNIVERSAL DESIGN) AND INTUITIVE SWITCH OPERATION.
- ENHANCED VERSATILITY INCLUDING USB PORT FOR OPTIONAL FLASH MEMORY OR KEYBOARD, PASSWORD PROTECTION AND DATA STRAGE.
- ALL-IN-ONE CHASSIS DESIGN: COMPACT, LIGHT-WEIGHT AND PREMIUM EXTERIOR DESIGN.
- CONFORMS TO STANDARD TEST METHOD  
(ISO 2592, ASTM D92, IP36)

### SINGLE ACTION SETTING

The flash detector rings and the temperature sensor are permanently mounted on a swing-arm assembly, which allows an easy setting of the specimen

### EASY OPERATION

Select a test mode and enter the expected flash point; while the instrument executes the test, you are free to do other lab work. The instrument follows the exact procedures prescribed in the test method, and the completion of the test cycle is signaled by beeps. The test result is brightly shown on the color LCD module.

### AUTO FIRE POINT DETECTION

In addition to the flash point, fire point can be determined automatically. The fire point is detected when the double Ionization rings detects 5 sec of continuous burning.

### AUTO FIRE CONTAINMENT

The fire containment lid activates automatically to help putting out fire when aco-8 detects a fire point or specimen is burning up heavily.

### DATA HANDLING

The unit is equipped to store up to 200 test results and export to an optional printer or to a LIMS through an RS-232 port or USB memory.

### USB PORT

A USB port allows connecting USB keyboard for easy entering sample name and connecting USB flash memory for data copy to a PC or test conditions/parameters copy to the tester.

### PASSWORD PROTECTION

With setting up password by the administrator, the device is protected against inadvertent change of parameters by the operator.

### ALL-IN ONE DESIGN IN LIGHTWEIGHT

The all-in-one design is much lighter than old model, ACO-7 by approximately 30%, which is world's smallest class in volume.

### SKIMMER FOR SURFACE SKIN (Asphalt Version Only)

For aco-8 asphalt version, a unique skimmer was added to automatically remove the surface skin that forms on the sample when bitumen or some other samples are tested. Surface skin removal has been known to improve the precision and the safety of the COC flash point testing of such samples.
